

Pass Cheat Sheet GIAC GPEN Exam ~ DumpsKey

Buy Actual GPEN Exam Questions for more info: <https://www.dumpskey.com/GPEN.html>

There are hundreds of people who attempt the GIAC GPEN certification exam every year. The number of students who pass the GIAC Certified Penetration Tester GPEN exam in the first attempt is very low than those who have to attempt it multiple times in order to succeed. This lead to the creation of demand of a program or solution which can guarantee success in the GIAC Certified Penetration Tester GPEN certification exam in the first attempt. With the increasing demand for such a program, many companies and online sites have tried and still trying to meet the demand of the clients. There has been no one except [Dumpskey](https://www.dumpskey.com/) who have been able to achieve this fleet of providing a solution to their clients which guarantees success in the first attempt.

So today, we will discuss how they have managed to provide a money back guarantee to their clients of passing the GIAC Certified Penetration Tester **GPEN exam** in the first attempt. Yes, you read it right. **Dumpskey** is so confident in their program that they are willing to refund all of your money if you buy their program, follow all the instructions and still manages to fail in the first attempt. A lot of research and resources have been utilized by [Dumpskey](https://www.dumpskey.com/) to make sure that they leave no room for any error in their program.

DUMPSKEY

We Offer Our GIAC GPEN Exam Product In Two Formats:

Since the demands of the clients are increasing and evolving, Dumpskey decided to offer their program in two formats which are listed and discussed as follows:

<https://www.dumpskey.com/>

- **Preparation material in PDF format**
- **Practice Exam Software**

1- Preparation material in PDF format:

For the students who don't need advanced preparation for the GIAC Certified Penetration Tester GPEN exam, Dumpskey is offering preparation material in PDF format. There are multiple reasons behind selecting the PDF format for their program. The decision was made while keeping in mind the evolving needs of the clients. The main reason behind choosing the PDF format was the easiness of accessibility. Since the PDF format is mobile phones and tablets friendly, you can access it easily at any time. You don't need to install any additional software in order to access the content of the program. Because of the PDF format, you can also easily port the files from one device to another. Now you must be thinking that there are also many other sites which are providing preparation material, so why this program is different and effective?

The main reason why the other programs offered online were not so effective is that the content included in those programs was not relevant to the actual exam. So to make sure that this is not the case with their program, Dumpskey consulted more than 90,000 professionals who are best suited to choose the most relevant content for the program. We also provide regular updates to their program since there might be changes in the GIAC Certified Penetration Tester GPEN certification exam.

2- Practice Exam Software:

The Practice Exam Software is the advanced version of the program offered by [Dumpskey](#). It is designed to make sure that their clients are best prepared to pass the GIAC Certified Penetration Tester GPEN exam in the first attempt. It is also designed while keeping in mind the factors behind the failure of candidates in their first attempt. One of the factors behind the failure of students while attempting the GIAC Certified Penetration Tester GPEN certification exam in the first attempt is the unfamiliarity with the exam environment. Since they are trying to pass the exam in the first attempt, they take too much pressure when they face the actual exam environment for the first time around.

In order to take care of this problem, [Dumpskey](#) is offering the ability to attempt a mock exam to their clients which are designed to be extremely similar to the actual GIAC Certified Penetration Tester exam. So by attempting the mock exam, the candidate will get familiar with the actual GIAC GPEN exam. The mock exam's format is the same as the actual exam and has questions which are very likely to be in the actual GIAC Certified Penetration Tester exam as well.

Dumpskey Renders Mock and Practice GPEN Exam Opportunity to Their Clients:

Apart from the mock GPEN exam, the Practice Exam Software has the following features:

i- Keeping track of progression:

Another key component of the GIAC Certified Penetration Tester Practice Exam Software is its ability to keep track of your progression. It will save all of your mistakes and changes that you make from your previous attempts. As a result, you will be able to highlight the areas which require more attention and preparation. It will also highlight the strong areas which don't require much time for preparation. So you will be able to plan your preparations according to your level of preparation.

ii- **Self-assessment:**

We realized that a key factor which can lead to the success of their clients is their ability to do self-assessment. After attempting the mock GIAC Certified Penetration Tester **GPEN** exam, you will be able to get to know how much prepared you are for the exam, what are your strengths, weaknesses, and opportunities. So in short, you will be able to do self-assessment which will surely lead to your success in the **GPEN** GIAC Certified Penetration Tester exam. So simulating real exam environment, being similar to the actual **GPEN** GIAC Certified Penetration Tester exam, ability to track the progression of the candidate and providing the ability to do self-assessment are the main components of the Practice Exam Software. As we discussed earlier, we consulted more than 90,000 professionals from all around the world. The same professionals also played a vital role in creating the Practice Exam Software.

Buy GIAC GPEN exam and Get 20% Discount

They made sure that the mock exam is relevant and similar to the actual GIAC Certified Penetration Tester **GPEN** exam so that the clients will not waste their time on preparation of something which is not likely to be in the actual GIAC Certified Penetration Tester **GPEN** exam. When you combine all of these great features; you have a program which can guarantee success to the candidates in the first attempt. These features are the reason behind the money back guarantee which comes with the program. You can download a free trial version of the program right now if you still have any concerns. We hope this discussion will assist you in your buying decision.

Version: 9.0

Question: 1

ACME corporation has decided to setup wireless (IEEE 802.11) network in it's sales branch at Tokyo and found that channels 1, 6, 9,11 are in use by the neighboring offices. Which is the best channel they can use?

- A. 4
- B. 5
- C. 10
- D. 2

Answer: D

Question: 2

Which Metasploitvncinject stager will allow VNC communications from the attacker to a listening port of the attacker's choosing on the victim machine?

- A. Vncinject/find.lag
- B. Vncinject/reverse.tcp
- C. Vncinject/reverse-http
- D. Vncinject /bind.tcp

Answer: B

Explanation:

Reference:

http://www.rapid7.com/db/modules/payload/windows/vncinject/reverse_tcp

Question: 3

What is the MOST important document to obtain before beginning any penetration testing?

- A. Project plan
- B. Exceptions document
- C. Project contact list
- D. A written statement of permission

Answer: A

Explanation:

Reference:

Before starting a penetration test, all targets must be identified. These targets should be obtained from the customer during the initial questionnaire phase. Targets can be given in the form of specific IP addresses, network ranges, or domain names by the customer. In some instances, the only target the customer provides is the name of the organization and expects the testers be able to identify the rest on their own. It is important to define if systems like firewalls and IDS/IPS or networking equipment that are between the tester and the final target are also part of the scope. Additional elements such as upstream providers, and other 3rd party providers should be identified and defined whether they are in scope or not.

Question: 4

While reviewing traffic from a tcpdump capture, you notice the following commands being sent from a remote system to one of your web servers:

```
C:\>sc winternet.host.com create ncservicebinpath- "c:\tools\ncexe -l -p 2222 -e cmd.exe"
```

```
C:\>sc vInternet.host.com query ncservice.
```

What is the intent of the commands?

- A. The first command creates a backdoor shell as a service. It is being started on TCP2222 using cmd.exe. The second command verifies the service is created and its status.
- B. The first command creates a backdoor shell as a service. It is being started on UDP2222 using cmd.exe. The second command verifies the service is created and its status.
- C. This creates a service called ncservice which is linked to the cmd.exe command and its designed to stop any instance of nc.exe being run. The second command verifies the service is created and its status.
- D. The first command verifies the service is created and its status. The second command creates a backdoor shell as a service. It is being started on TCP 2222 connected to cmd.exe.

Answer: C

Question: 5

Which of the following best describes a client side exploit?

- A. Attack of a client application that retrieves content from the network
- B. Attack that escalates user privileged to root or administrator
- C. Attack of a service listening on a client system
- D. Attack on the physical machine

Answer: C

Question: 6

Which of the following TCP packet sequences are common during a SYN (or half-open) scan?

- A. The source computer sends SYN and the destination computer responds with RST
- B. The source computer sends SYN-ACK and no response is received from the destination computer
- C. The source computer sends SYN and no response is received from the destination computer

- D. The source computer sends SYN-ACK and the destination computer responds with RST-ACK
- A. A,B and C
 - B. A and C
 - C. C and D
 - D. C and D

Answer: C

Question: 7

Which of the following describes the direction of the challenges issued when establishing a wireless (IEEE 802.11) connection?

- A. One-way, the client challenges the access point
- B. One-way, the access point challenges the client
- C. No challenges occur (or wireless connection)
- D. Two-way, both the client and the access point challenge each other

Answer: D

Question: 8

You have gained shell on a Windows host and want to find other machines to pivot to, but the rules of engagement state that you can only use tools that are already available. How could you find other machines on the target network?

- A. Use the "ping" utility to automatically discover other hosts
- B. Use the "ping" utility in a for loop to sweep the network.
- C. Use the "edit" utility to read the target's HOSTS file.
- D. Use the "net share" utility to see who is connected to local shared drives.

Answer: B

Explanation:

Reference:

<http://www.slashroot.in/what-ping-sweep-and-how-do-ping-sweep>

Question: 9

A penetration tester obtains telnet access to a target machine using a captured credential. While trying to transfer her exploit to the target machine, the network intrusion detection systems keeps detecting her exploit and terminating her connection. Which of the following actions will help the penetration tester transfer an exploit and compile it in the target system?

- A. Use the http service's PUT command to push the file onto the target machine.
- B. Use the scp service, protocol SSHv2 to pull the file onto the target machine.

- C. Use the telnet service's ECHO option to pull the file onto the target machine
- D. Use the ftp service in passive mode to push the file onto the target machine.

Answer: D

Question: 10

What section of the penetration test or ethical hacking engagement final report is used to detail and prioritize the results of your testing?

- A. Methodology
- B. Conclusions
- C. Executive Summary
- D. Findings

Answer: C

Question: 11

You are pen testing a Windows system remotely via a raw netcat shell. You want to quickly change directories to where the Windows operating system resides, what command could you use?

- A. cd systemroot
- B. cd-
- C. cd /systemroot/
- D. cd %systemroot%

Answer: B

Question: 12

A client with 7200 employees in 14 cities (all connected via high speed WAN connections) has suffered a major external security breach via a desktop which cost them more than \$172,000 and the loss of a high profile client. They ask you to perform a desktop vulnerability assessment to identify everything that needs to be patched. Using Nessus you find tens of thousands of vulnerabilities that need to be patched. In the report you find workstations running several Windows OS versions and service pack levels, anti-virus software from multiple vendors several major browser versions and different versions of Acrobat Reader. Which of the following recommendations should you provide with the report?

- A. The client should standardize their desktop software
- B. The client should eliminate workstations to reduce workload
- C. The client should hire more people to catch up on patches
- D. The client should perform monthly vulnerability assessments

Answer: C

Question: 13

Which Metasploit payload includes simple upload and download functionality for moving files to and from compromised systems?

- A. DLL inject
- B. Upexec
- C. Meterpreter
- D. Vncinject

Answer: D

Explanation:

Reference:

<http://www.opensourceforu.com/2011/02/metasploit-meterpreter-payload/>

Question: 14

A junior penetration tester at your firm is using a non-transparent proxy for the first time to test a web server. He sees the web site in his browser but nothing shows up in the proxy. He tells you that he just installed the non-transparent proxy on his computer and didn't change any defaults. After verifying the proxy is running, you ask him to open up his browser configuration, as shown in the figure, which of the following recommendations will correctly allow him to use the transparent proxy with his browser?

- A. He should change the PORT: value to match the port used by the non-transparent proxy.
- B. He should select the checkbox "use this proxy server for all protocols" for the proxy to function correctly.
- C. He should change the HTTP PROXY value to 127.0.0.1 since the non-transparent proxy is running on the same machine as the browser.
- D. He should select NO PROXY instead of MANUAL PROXY CONFIGURATION as this setting is only necessary to access the Internet behind protected networks.

Answer: C

Question: 15

Which of the following describe the benefits to a pass-the-hash attack over traditional password cracking?

- A. No triggering of IDS signatures from the attack privileges at the level of the acquired password hash and no corruption of the LSASS process.
- B. No triggering of IDS signatures from the attack, no account lockout and use of native windows file and print sharing tools on the compromised system.
- C. No account lockout, privileges at the level of the acquired password hash and use of native windows file and print sharing tools on the compromised system.

D. No account lockout, use of native file and print sharing tools on the compromised system and no corruption of the LSASS process.

Answer: D

Question: 16

You are pen testing a Linux target from your windows-based attack platform. You just moved a script file from the windows system to the Linux target, but it will not execute properly. What is the most likely problem?

- A. The byte length is different on the two machines
- B. End of-line characters are different on the two machines
- C. The file must have become corrupt during transfer
- D. ASCII character sets are different on the two machines

Answer: A

Question: 17

Which of the following is the JavaScript variable used to store a cookie?

- A. Browsercookie
- B. Windowcookie
- C. Document cookie
- D. Session cookie

Answer: C

Explanation:

Reference:

http://www.w3schools.com/js/js_cookies.asp

Question: 18

Analyze the command output below. Given this information, which is the appropriate next step for the tester?

Starting Nmap4.53 (hnp://insecure.org | at 2010-09-30 19:13 EDT interesting ports on 192.163.116.101:

PORT STATE SERVICE

130/tcp filtered cisco-fna

131/tcp filtered cisco-tna

132/tcp filtered cisco-sys

133/tcp filtered statsrv

134/tcp filtered Ingres-net

135/tcp filtered msrpc

136/tcp filtered profile

137/tcp filtered netbios-ns
138/tcp filtered netbios-dgm
139/tcp open netbios-ssn
140/tcp filtered emfis-data
MAC Address: 00:30:18:B8:14:8B (Shuttle)
warning: OSS can results may be unreliable because we could not find at least 1 open and 1 closed port
Device type, general purpose
Running: Microsoft Windows XP
OS details: Microsoft Windows XP SP2
Network Distance : 1 hop
Nmap done: 1 IP address (1 host up) scanned in 1.263 seconds

- A. Determine the MAC address of the scanned host.
- B. Send a single SYN packet to port 139/tcp on the host.
- C. Send spoofed packets to attempt to evade any firewall
- D. Request a list of shares from the scanned host.

Answer: B

Question: 19

The resulting business impact, of the penetration test or ethical hacking engagement is explained in what section of the final report?

- A. Problems
- B. Findings
- C. Impact Assessment
- D. Executive Summary

Answer: D

Explanation:

Reference:

<http://www.frost.com/upld/get-data.do?id=1568233>

Question: 20

You have been contracted to map me network and try to compromise the servers for a client. Which of the following would be an example of scope creep' with respect to this penetration testing project?

- A. Disclosing information forbidden in the NDA
- B. Compromising a server then escalating privileges
- C. Being asked to compromise workstations
- D. Scanning network systems slowly so you are not detected

Answer: B

Question: 21

You are running a vulnerability scan on a remote network and the traffic is not making it to the target system. You investigate the connection issue and determine that the traffic is making it to the internal interface of your network firewall, but not making it to the external interface or to any systems outside your firewall. What is the most likely problem?

- A. Your network firewall is blocking the traffic
- B. The NAT or port tables on your network based firewall are filling up and dropping the traffic
- C. A host based firewall is blocking the traffic
- D. Your ISP is blocking the traffic

Answer: C

Question: 22

Identify the network activity shown below;

```

09:12:43.195402 arp who-has 192.168.1.1 (ff:ff:ff:ff:ff:ff) tell 192.168.1.238
09:12:43.195883 arp who-has 192.168.1.2 (ff:ff:ff:ff:ff:ff) tell 192.168.1.238
09:12:43.196144 arp who-has 192.168.1.3 (ff:ff:ff:ff:ff:ff) tell 192.168.1.238
09:12:43.196458 arp who-has 192.168.1.4 (ff:ff:ff:ff:ff:ff) tell 192.168.1.238
09:12:43.196885 arp who-has 192.168.1.5 (ff:ff:ff:ff:ff:ff) tell 192.168.1.238
09:12:43.197339 arp who-has 192.168.1.6 (ff:ff:ff:ff:ff:ff) tell 192.168.1.238
09:12:43.197756 arp who-has 192.168.1.7 (ff:ff:ff:ff:ff:ff) tell 192.168.1.238

09:12:43.231961 arp who-has 192.168.1.40 (ff:ff:ff:ff:ff:ff) tell 192.168.1.238

```

- A. A sweep of available hosts on the local subnet
- B. A flood of the local switch's CAM table.
- C. An attempt to disassociate wireless clients.
- D. An attempt to impersonate the local gateway

Answer: D

Question: 23

You have compromised a Windows workstation using Metasploit and have injected the Meterpreter payload into the svchost process. After modifying some files to set up a persistent backdoor you realize that you will need to change the modified and access times of the files to ensure that the administrator can't see the changes you made. Which Meterpreter module would you need to load in order to do this?

- A. Core
- B. Priv
- C. Stdapi
- D. Browser

Answer: D

Question: 24

How can web server logs be leveraged to perform Cross-Site Scripting (XSSI)?

- A. Web logs containing XSS may execute shell scripts when opened in a GUI textbrowser
- B. XSS attacks cause web logs to become unreadable and therefore are an effective DOS attack.
- C. If web logs are viewed in a web-based console, log entries containing XSS may execute on the browser.
- D. When web logs are viewed in a terminal. XSS can escape to the shell and execute commands.

Answer: C

Question: 25

What is the impact on pre-calculated Rainbow Tables of adding multiple salts to a set of passwords?

- A. Salts increase the time to crack the original password by increasing the number of tables that must be calculated.
- B. Salts double the total size of a rainbow table database.
- C. Salts can be reversed or removed from encoding quickly to produce unsalted hashes.
- D. Salts have little effect because they can be calculated on the fly with applications such as Ophcrack.

Answer: B
